04 / 16

API3

What does API3 do?

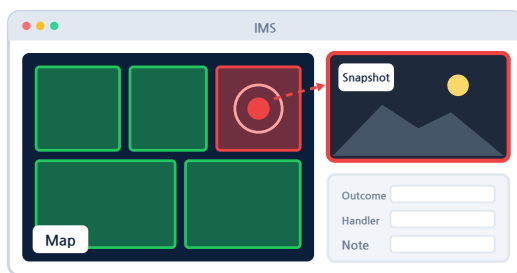

Flip over and answer with this

A 02

IMS integrated monitoring

Shows site events on a map.
An alarm brings up a snapshot.
Records the outcome and handler.
Software that receives events.

Map, snapshot and record in one place.

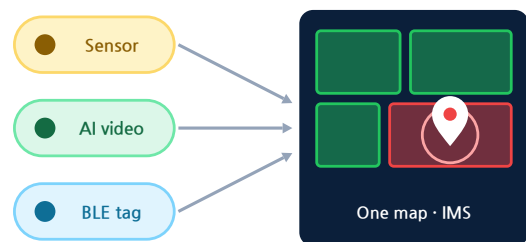

2026 Product Catalog

A 01

One sentence

Sensor · AI video · BLE tag events,
monitored on one map.
IMS is at the center.
On site: EDGE · API3 · RTLS.

From alarm check to action log,
all on one screen.

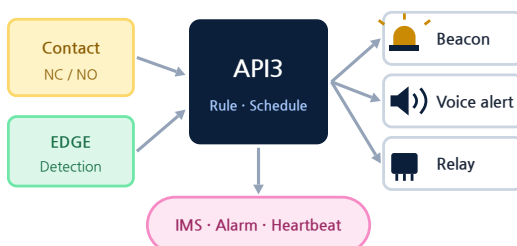

2026 Product Catalog

A 04

API3 sensor integration

Watches sensor contacts (NC/NO).
Automatic output by rule · schedule.
Relay · Beacon · Voice alert.
Links EDGE detections to devices.
Sends alarm · heartbeat to IMS.

A sensor trip turns on lights and sound.

2026 Product Catalog

A 03

EDGE video detection

Detects people · vehicles with AI.
Judges only inside set zones.
Watches many cameras at once.
Sends detections and snapshots to IMS.

People and vehicles in video, with snapshots.

Night vehicle detection example · Catalog 2026

05 / 16

RTLS

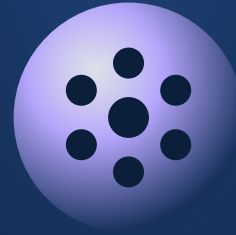

What does RTLS watch?

Flip over and answer with this

06 / 16

Layout

What sits around IMS?

07 / 16

Monitoring

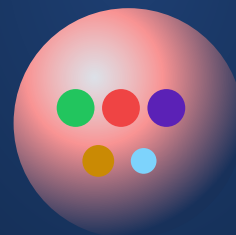

After an alarm, what next?

Flip over and answer with this

08 / 16

Monitoring

What do map colors mean?

Flip over and answer with this

A 06

Paired links

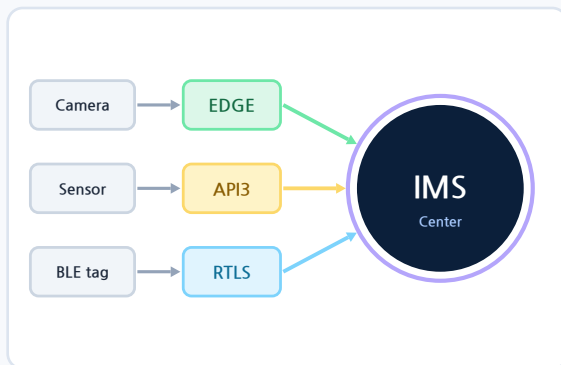

IMS is in the middle.

EDGE — Camera

API3 — Sensor

RTLS — BLE tag

Name each product with its input.

2026 Product Catalog

A 05

RTLS tag monitor

The ITS receives BLE directly.

Minew BeaconPlus tags.

MOKO BeaconX Pro tags.

Motion · Acceleration · Temp · Battery.

Alerts on anomalies and abandonment.

Standalone, or with IMS.

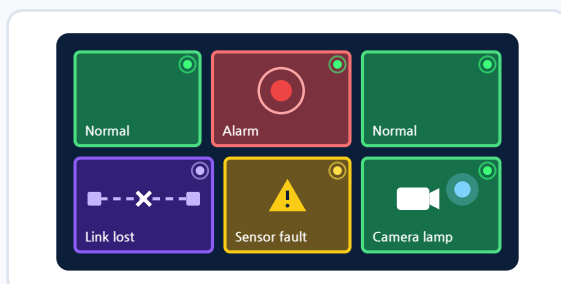

Sensor monitor example · Catalog 2026

A 08

Map colors

- Green Normal
- Red Alarm
- Green dot Heartbeat (blinks per signal)
- Purple Link lost
- Yellow Sensor fault
- Sky blue Camera lamp

Zone names on the map are examples.

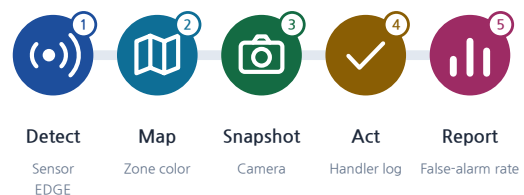

2026 Product Catalog

A 07

Five steps

- 1 Detect — Sensor · EDGE · API3
- 2 Map — Zone color changes
- 3 Snapshot — Linked camera
- 4 Act — Outcome · Handler · Note
- 5 Report — Daily · History · False-alarm rate

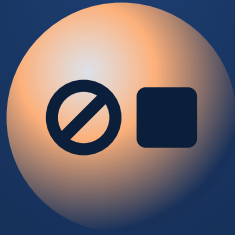

Say the five steps in order.

2026 Product Catalog

Operations

Do cameras need replacing?

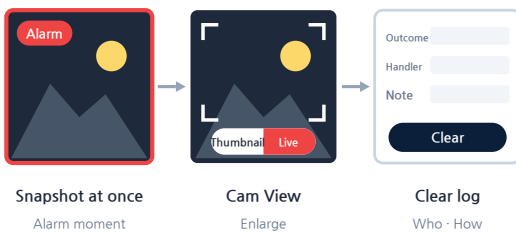

Flip over and answer with this

A 10

Snapshot · Action

The alarm snapshot opens at once.
Enlarge it in Cam View.
Switch to thumbnails or live.
On clear: outcome · handler · note.

See it, then record who closed it and how.

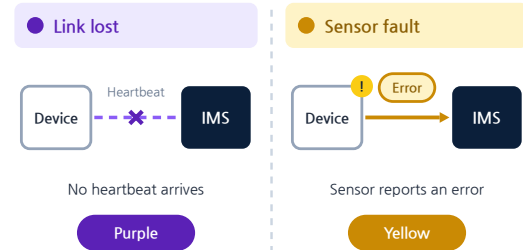

2026 Product Catalog

A 09

Telling faults apart

No heartbeat means link lost.
An error sent by a sensor is a sensor fault.
Link lost is purple; sensor fault is yellow.

A dead link and a broken sensor are kept apart.

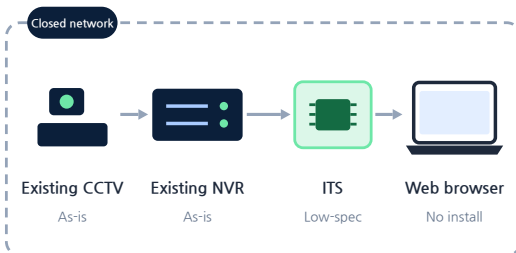

2026 Product Catalog

A 12

Existing equipment

Existing CCTV · NVR are reused.
Runs on closed networks.
Works on low-spec ITS too.
Access is by web browser.

View in a browser, nothing to install.

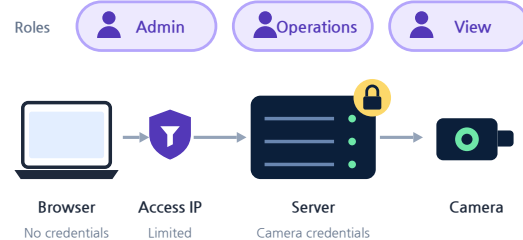

2026 Product Catalog

A 11

Reports · Permissions

Daily report, history, false-alarm rate.
Roles: admin · operator · viewer.
Access can be limited by IP.
Camera credentials stay on the server.

Credentials never reach the browser.

16 / 16

Company

Numbers and contacts?

Flip over and answer with this

A 14

Applications

Factory · Power plant — fence trip,
EDGE confirms a person, IMS alarm.
Corrections · Defense — zones, action history.
Airport · Port · Logistics — large sites.
Data center · Public — access and links.

Locations show at once as map zones.

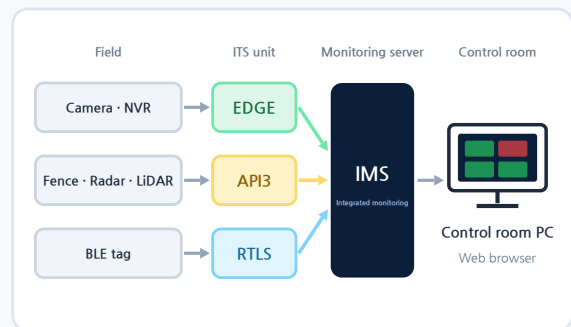

2026 Product Catalog

A 13

System architecture

Video — Camera · NVR → EDGE
Contact — Fence · Radar · LiDAR → API3
Location — BLE tag → RTLS
Hub — IMS integrated monitoring
View — Control room PC, web browser

Some boxes drop out on smaller sites.
