

INTEGRATED SECURITY MONITORING

Sensor · AI video · BLE tag events — **One map** monitors them all.

Built around IMS integrated monitoring, with EDGE · API3 · RTLS on one site.
Alarm, snapshot and action log — all on one screen.

Around IMS, each product pairs with its field input

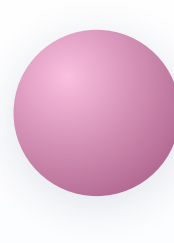

200+ Deployment projects
2019 – 2025

9,000+ Installed sensor nodes
ITS (sensor terminal) patent filed

3 Countries with offices
Korea · Vietnam · Canada

PLATFORM

Start with IMS, add only what you need

IMS
Integrated monitoring

- Live status on the map
- Snapshot · Cam View
- Action log · Reports

Live map
Action log

Access **Browser · No install**

EDGE
AI video detection

- People · vehicle detection
- Zone filter decisions
- Many cameras at once

Person · Vehicle
Zone filter

To IMS **Events + snapshots**

API3
Sensor integration hub

- Sensor contact (NC/NO) watch
- Relay · Beacon · Voice output
- Rule · Schedule automation

Relay output
Schedule

To IMS **Alarm · Heartbeat**

RTLS
BLE tag monitoring

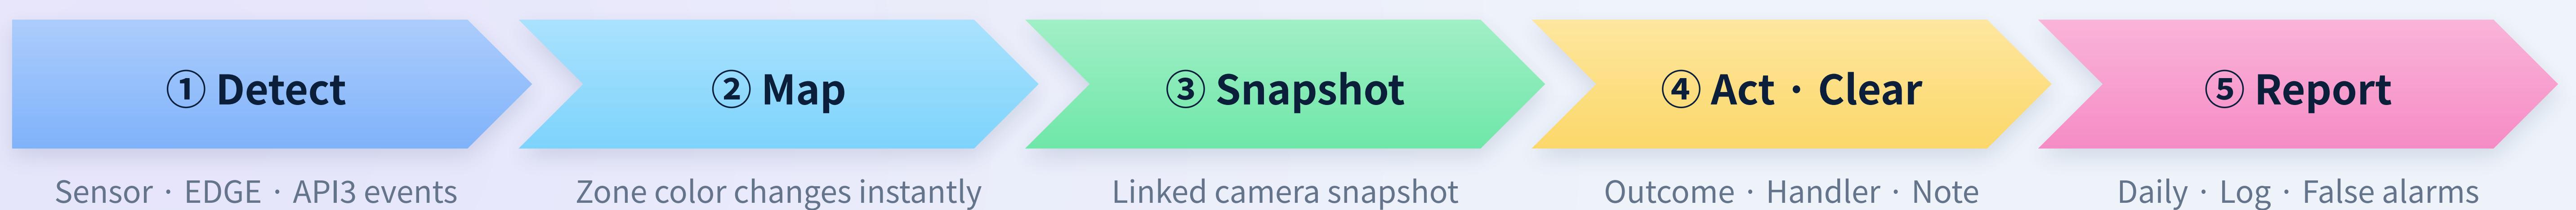

- Direct BLE reception
- Motion · Acceleration · Temp
- Anomaly · Idle alerts

Direct BLE
Temp · Battery

Operations **Standalone or IMS**

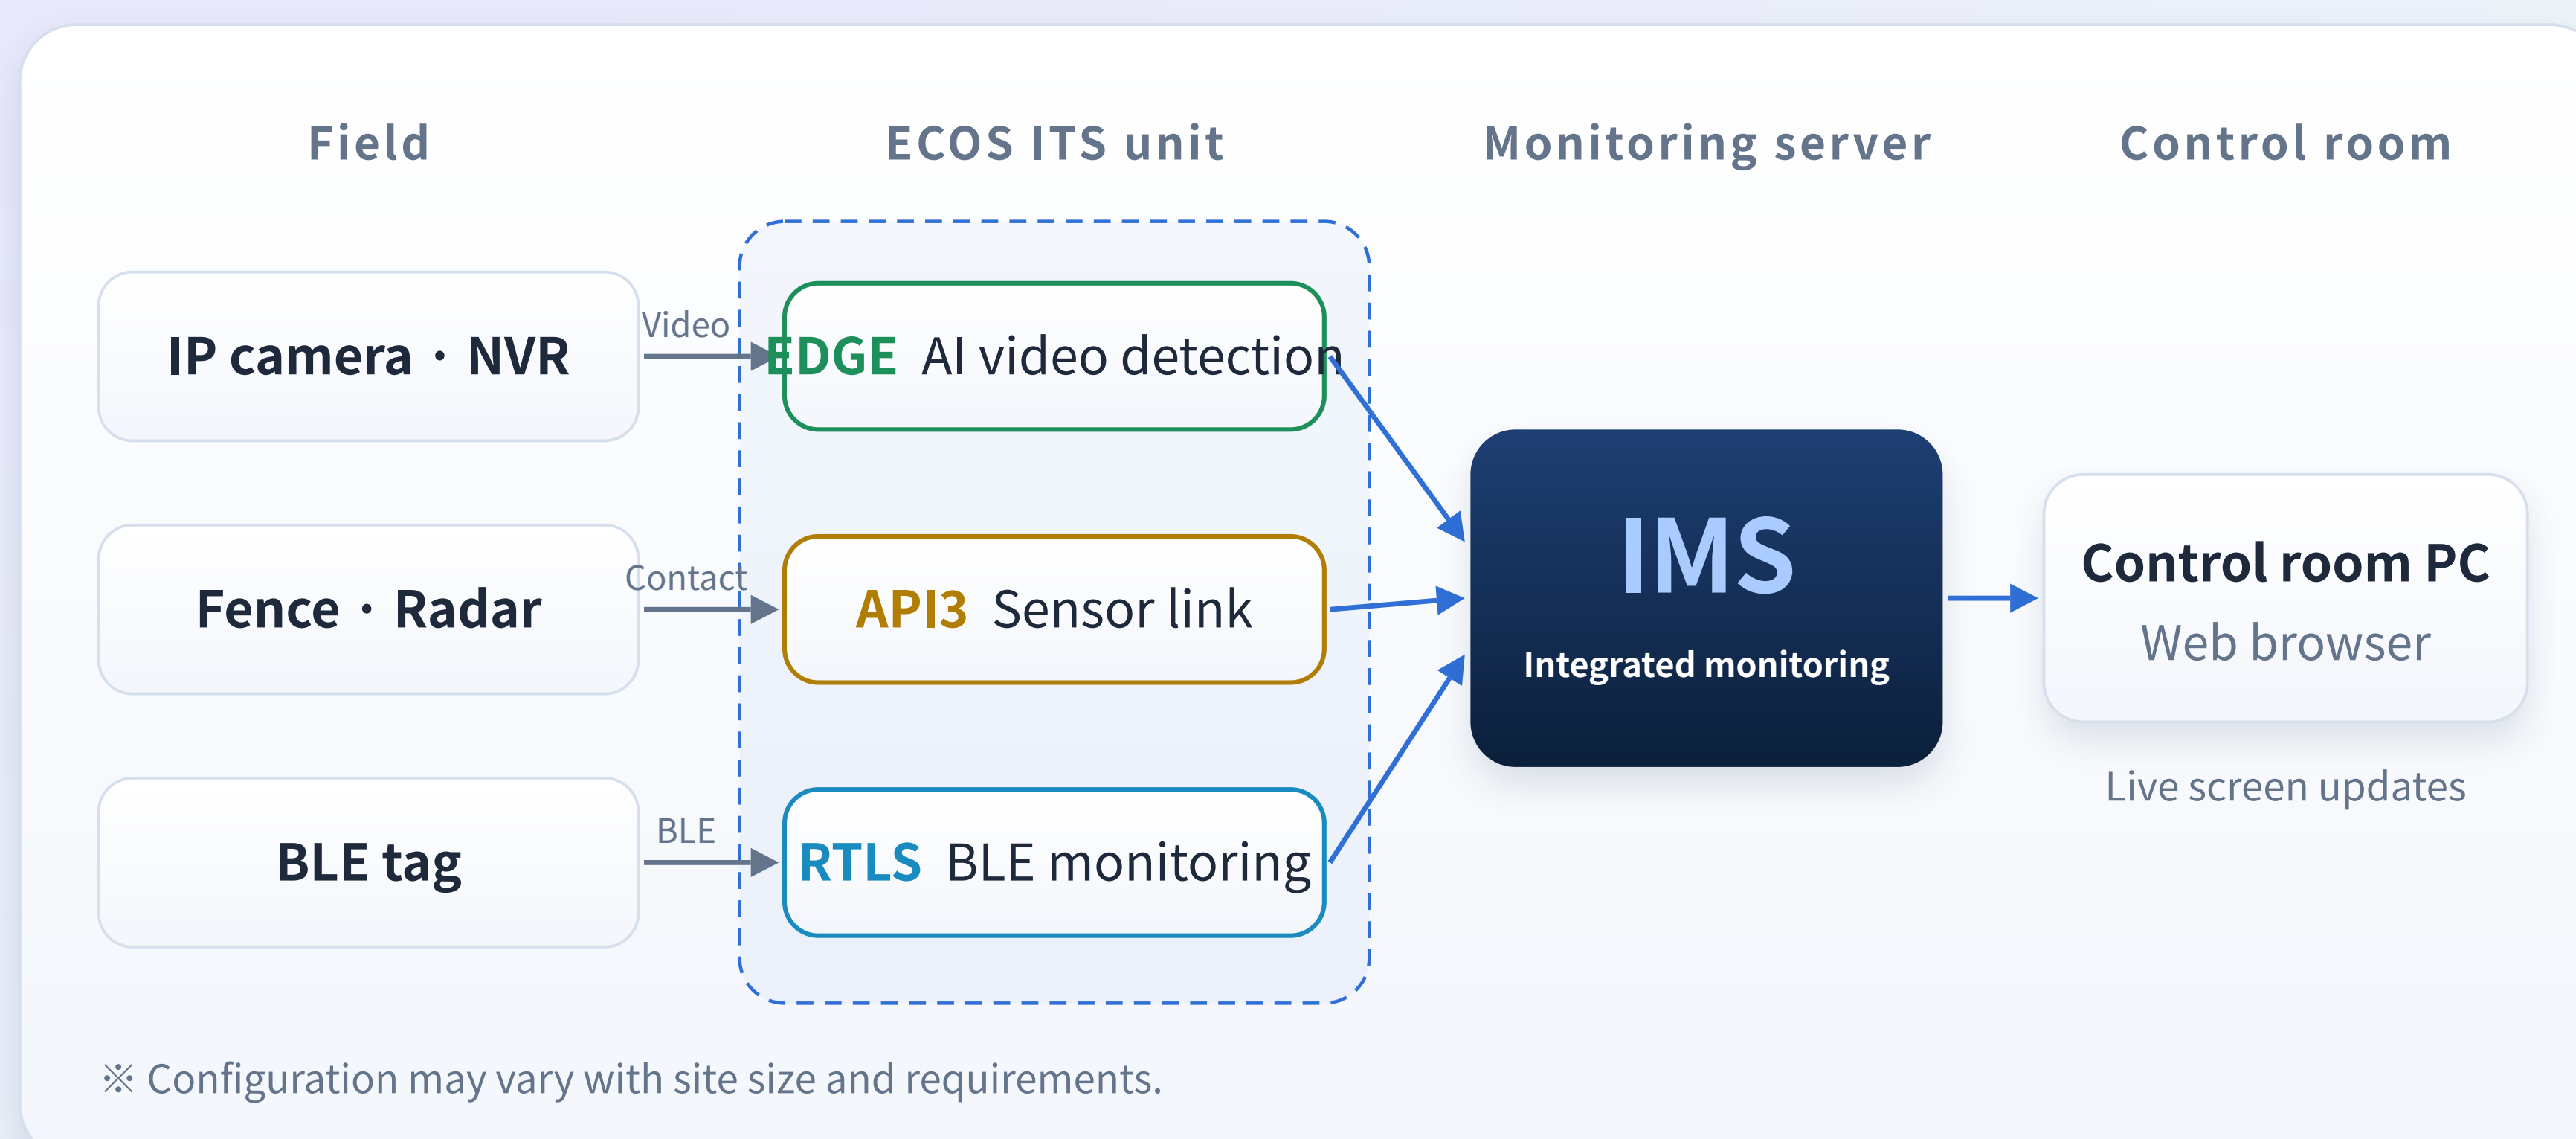

HOW IT WORKS

From detection to report, on one screen

SYSTEM

From field devices to the control room

PRODUCTS

ECOS hardware
